

Amendments to the Specification:

Please replace the paragraph beginning at page 4, line 6, with the following amended paragraph:

The spacer 40 is in this case fitted securely on the hollow body 10 by flanging with an inserted ring. In addition, the flow nozzle 50 is fitted securely on the spacer 40 by screwing. Finally, the pipe 60 is fitted securely and in a leaktight manner on the hollow body 10 by flanging or screwing. A pipe 75 sealingly connected to flow nozzle 50 supplies gas from a compressed air generator.
